# Gum Reshaping

Improve the look of your mouth and smile today with the painless gum reshaping process.

## About

Gingival sculpting, also known as gum contouring or reshaping, is a minimally-invasive cosmetic procedure that involves reshaping and removing excess gum tissue around your teeth.

## Cost | From \$1,200

Several factors can vary and increase the cost of treatment.

## Why Reshape Your Gums?

Gum reshaping can be performed to treat a range of cosmetic problems including Gummy smile, Uneven gum contours, Loss of papillae (small amounts of gum tissue between your teeth) and Exposed root surfaces.

If you have developed deep gum pockets due to improper tooth brushing and the accumulation of calculus and plaque, gum reshaping can help with this too. If you have advanced periodontal disease (gum disease) you may also require gum surgery to repair the damaged gums and protect the remaining healthy tissue.
