Paramount Dental Sydney

Nasal Enhancement

Our professional team has specialised skills as well as a detailed knowledge of the anatomy of your face to enhance your nose.

About

Until recently if you wanted to change the look of your nose, your only choice was surgery: expensive, permanent and a long recovery time.

Paramount Dental Sydney offer the latest technologies in cosmetic treatments.

Cost | From \$275 Per Area

Several factors can vary and increase the cost of treatment.

Procedure | Injections

A nasal enhancement procedure is perfect for someone who has a pronounced bump on the bridge of their nose. We fill the area around the bump with a series of tiny injections using a facial filler. The illusion of a perfectly straight nose is created immediately. The main contributor to the ageing of your face is volume loss so injectable facial fillers are perfect for countering this problem.

The effects of the fillers last from 3 to 6 months depending on your genetics and lifestyle. This type of treatment for your nose does require maintenance and repeated investment, but many patients prefer this option to permanent and expensive surgery.
