

# Sedation Therapy

Take away your anxiousness on your next dentist visit with your choice of sedation therapy.

## Cost | Excluding Cost of Treatment Procedure

- IV Sedation | \$450 per hour  
(\$100 per additional 30 mins)
- Nitrous Oxide | \$100 per 30 mins
- Oral Sedation | No additional costs

Patients who are not well suited to **IV sedation** are: People with fear of needles, Pregnant women, People suffering from glaucoma, lung or kidney problems and People with allergies to sedative drugs.

## IV (Twilight) Sedation [Degree of Relaxation: Very High]

The IV sedation is administered through a vein in your arm and will make you feel like you are asleep. Although you remain conscious, you will still be able to follow our instructions.

## Nitrous Oxide (Laughing Gas) [Degree of Relaxation: High]

Though nitrous oxide does not put you to sleep, it is effective at reducing your anxiety and is also very safe.

## Oral Sedation [Degree of Relaxation: Medium]

The oral sedation method comes in a form of a pill or liquid. You may still be awake but you won't experience any pain and all anxiety goes away.

Paramount Dental Sydney
